# MICRO•ROCK®

## A FIRE RESISTANT TECHNOLOGY

Harder than conventional molded plaster, **Micro-Rock®** is a composite of fire resistant products, is very resistant to heat, is elegant and has a very competitive price. Because it is non-combustible, it can be installed close to your fireplace without having to worry about the norms that insurance companies impose on you. The product makes all cabinet makers embarrassed because they cannot imitate our product with the same quality finish and low price as we do. Also, **Micro-Rock®** is built to be painted (1) as often as you would like. When ordering faux-finishes you can give the look of wood, marble or granite etc.

(1) It is recommended to use a sealer and a latex acrylic paint of good quality.

The architectural stone-finish made an amazing market entry with 5 very distinct colors, with prices more competitive than ever. Closely resembling a stone look, except for price and weight, it is also easy to work with.

By always being ahead and listening to customer requests, and to fulfill the increasing demand, we created products, such as the Prestige Series, Varieties Series, 3-faces and 4-faces Series, Zen Series and Blocks to cover your walls and to bring more beauty to your decor.

With a large selection of products, the **FINI-PLUS** mantels are easy to install and one will surely fit your home. You may add a personal touch by choosing any of the optional ornaments that will make your mantel unique. Remember that the posts of your mantel can be cut to the height of your choice with a handsaw or grinder, and the posts can be moved sideways to fit basically any fire place on today's market.

With the **FINI-PLUS** specialists, you are free to choose the product that suits your decor. You are the one who chooses the style for your fireplace. You just have to select the top, the posts and the ornaments of your choice and make sure it correctly fits your fireplace by referring to the measurement table on page 26.

### THE LOGICAL CHOICE IN MANY WAYS...

- Ecological, elegant, safe, affordable
- Made of non-combustible materials
- The only mantels approved by **ITS/Warnock Hershey**
- Made to be painted (100% acrylic latex)
- Available in several stone colors or faux-finishes
- Quick and easy to install
- **Micro-Rock®** is a guaranteed product
- 100% Canadian product
- We can custom make to suit your needs
- You can combine both, Harmonie and Selection Series

*Multi-Purpose and innovative since 1985*

**The best is possible, at better prices.**

At **FINI-PLUS**, it is an art that we have mastered throughout the years enable us to grown successfully since 1985 through many years of research and innovation, has allowed us to become one of the largest manufacturers of non-combustible mantels in North America. Originally, our goal was to offer a range of products that would reach the highest expectations and would allow the consumer to build a mantel that would answer their needs. because of the range of tops and posts, there is almost an unlimited number of possibilities. We wanted everything to be done in a simple, yet efficient way.

*«After all these years of research, we have now achieved our goal»*

**2-YEAR LIMITED WARRANTY**

# Fi+ Installation? Easier than you think...

## INCLUDED IN YOUR INSTALLATION KIT ARE:

- 1 Installation guide with pictures and drawings
- 1 Sandpaper block
- 1 "L" shaped metal support 1" (2,54 cm) x 2" (5,08 cm) x 60" (152,4 cm)
- 8 x 1 5/8" (4,13 cm) gyproc screws
- 4 Caps (for paint finish only)
- 20 ml of the **MICRO-ROCK** composite.
- If you purchased a "Faux-Fini" you will also receive touch up paint for the Faux-Fini

Included with the stone-finish mantel :  
Powder to be diluted with some water

Your retailer is our best resource. With them, plan a visit in our showroom where all our old and new models are displayed, in order to facilitate your choice. We also make home visit if you are within 75 km of the center of Montreal, to take the appropriate measurements and make suggestions to help with your decisions.

Fini-Plus also offer installation services in conjunction with your retailer.

## Handy tips

- Your wall should be 72 (182,88 cm) inches wide to avoid costly adjustments.
- The top of your mantel should be at +/- 54 inches. (137,16 cm)
- The highest part of your fireplace should not exceed 48 inches. (121,92 cm)
- Weight of the top varies between 40 to 80 pounds. (18 à 36 kg)
- Weight of a post varies between 12 to 24 pounds. (5 à 10 kg)
- Working slowly and carefully often results in faster and better installation.
- If you follow the instructions in the installation guide, you will be able to remove your mantel in less than 5 minutes allowing you to either paint with no detailing to worry about, or go behind your wall to inspect the fireplace, the chimney etc...

## TOOLS REQUIRED FOR THE INSTALLATION

- Level
- Measuring tape
- Drill with star bit
- Star screwdriver
- Flexible-metal spatula tool
- Pencil
- 8-teeth/inch saw (for wood) or grinder with diamond blade without segment.
- Silicone gun
- Latex silicone

Box sizes:

Top : 75" (190 cm) x 10" (27 cm) x 16" (43 cm)

Posts : 51" (130 cm) x 12" (32 cm) x 12" (30 cm)

The boxes and the Styrofoam block can be used as a workbench. See picture 3 and 4.

The metal «L» shaped wall mount is 1" (2,54 cm) x 2" (5,08 cm) x 60" (152,4 cm), is used to secure the top to the wall. Screw right in the fold part to the wall.

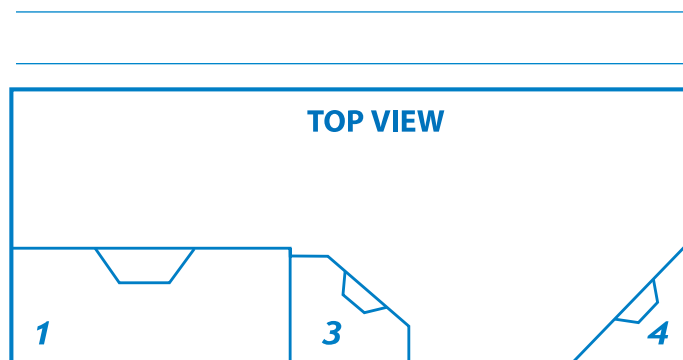

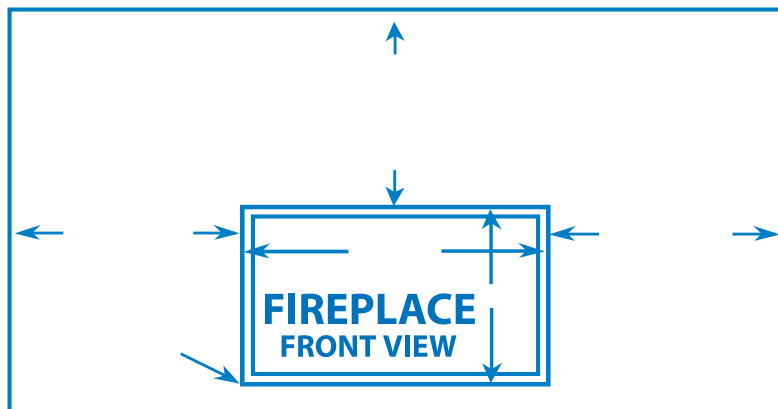

Cut posts by hand saw. When performing the installation, use the transport boxes as a workbench with the styrofoam blocks. N.B.: Do not leave any part of the post without support when you cut it. It needs to be flat everywhere and the cut should be made in the middle of the styrofoam that you have placed underneath.

You should adjust the back of the top and the post with the sandpaper block supplied. That way, you will not have to make silicone joints that are not as appealing or practical for the installation and would reduce its aesthetic design and cancel the warranty.
